Ruthvik Reddy Kambam

Data Analyst | Tampa, FL | +1 (561) 617-4443 | Ruthvikkambam1@gmail.com | LinkedIn | GitHub Profile

Professional Summary

- **Data Analyst** with around **5 years of experience** delivering business intelligence, data analytics, and cloud-based reporting solutions across healthcare, fintech, and enterprise environments, helping organizations transform complex data into meaningful business insights.
- Experienced in designing intuitive dashboards, executive scorecards, and self-service reporting solutions using **Power BI**, **Microsoft Fabric**, and **Tableau**, enabling stakeholders to monitor KPIs, identify trends, and make informed business decisions.
- Strong hands-on experience in collecting, integrating, cleansing, and analyzing data from multiple enterprise sources using **SQL**, **Azure SQL Database**, **SQL Server**, **Azure Synapse Analytics**, and cloud-based platforms to ensure reliable and accurate reporting.
- Skilled in developing scalable analytical solutions with Microsoft Fabric, including Lakehouse, Dataflows Gen2, Semantic Models, and OneLake, supporting modern enterprise reporting and centralized data management.
- Hands-on experience processing large volumes of structured and semi-structured data using **Azure Databricks**, **PySpark**, and **Spark SQL**, delivering high-performance analytical solutions for business reporting.
- Well-versed in creating optimized data models using **Star Schema**, developing advanced business calculations with **DAX**, and performing data transformation through **Power Query** and **M Query** to improve reporting accuracy and performance.
- Experienced in using **Python**, **Pandas**, and **NumPy** for data preparation, exploratory data analysis, statistical processing, automation, and ad hoc analytical tasks that support data-driven decision-making.
- Strong understanding of enterprise data governance and security through the implementation of **Row-Level Security (RLS)**, **Unity Catalog**, workspace permissions, and governed semantic models, ensuring secure and compliant access to business data.
- Familiar with modern deployment and DevOps practices using **Azure DevOps**, **Git**, **CI/CD pipelines**, and **Fabric Deployment Pipelines**, supporting streamlined release management and collaborative development workflows.

Technical Skills:

- **Business Intelligence & Reporting Tools:** Power BI Desktop, Power BI Service, Power BI Gateway, Power BI Paginated Reports, Tableau Desktop, Tableau Server, MS Excel, Power Pivot, PivotTables
- **Cloud Platforms & Analytics Services:** Microsoft Fabric, Azure Synapse Analytics, Azure Databricks, Azure SQL Database, Azure Data Factory (ADF), Lakehouse Architecture, Delta Lake
- **Programming & Query Languages:** SQL, T-SQL, Python, PySpark, Spark SQL, DAX, M Query
- **Python Libraries & Data Analysis:** Pandas, NumPy, Scikit-Learn, MLflow
- **Data Modeling & Warehousing:** Star Schema, Snowflake Schema, Semantic Modeling, Data Warehousing, OLAP Cubes, SSAS
- **ETL / ELT & Data Integration:** ETL Pipelines, ELT Processes, SSIS, Dataflows Gen2, Data Cleansing, Data Transformation, Data Validation
- **Big Data & Modern Data Engineering:** Medallion Architecture (Bronze/Silver/Gold), Incremental Refresh, Partition Pruning, Query Folding, Delta Tables
- **Automation, DevOps & Version Control:** Power Automate, Azure DevOps (ADO), Azure DevOps CI/CD, Git, Deployment Pipelines
- **Project Management & Collaboration Tools:** JIRA, Confluence, MS Visio, SharePoint, Agile Methodology, Scrum Framework
- **Core Analytical Capabilities:** Dashboard Development, KPI Reporting, Data Visualization, Trend Analysis, Business Intelligence Reporting, Ad-hoc Reporting, Analytical Problem Solving

Projects

Australian Job Market Intelligence | Python, Pandas, Matplotlib, Seaborn

• Analyzed Australian job postings to compare Data Analyst and Data Scientist demand, required skills, and location-based hiring trends.

• Performed data cleaning, schema standardization, dataset merging, exploratory data analysis, skill extraction, and comparative visualizations.

Education

Florida Atlantic University | Jan 2024 – Dec 2025

- Master's in Information Technology & Management with specializations in Computer Science & Data Analytics
- Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), India | Jun 2018 – Jul 2022
  Bachelor's in Computer Science

Certifications:

- Microsoft Power BI Data Analyst Associate (PL-300)
- Google Data Analytics Professional Certificate

Professional Experience:

AdventHealth **Orlando, FL**
Data Analyst **Aug 2024 – Present**
Project: Healthcare Operations & Patient Utilization Analytics

- Examined patient utilization, healthcare operations, and financial datasets to uncover changes in service demand, departmental workloads, and resource allocation, giving stakeholders a clearer picture of day-to-day operational performance.
- Translated business questions into complex **SQL** queries involving **CTEs, joins, subqueries, window functions, and aggregations** to retrieve relevant records and investigate trends across healthcare and operational databases.
- Cleaned and standardized inconsistent datasets with **Python, Pandas, and NumPy**, addressing missing values, duplicate entries, and formatting issues before the information was used for further analysis.
- Investigated fluctuations in appointment volumes, patient admissions, service utilization, and length of stay through **exploratory data analysis (EDA)**, helping business teams distinguish recurring patterns from unusual changes in operational data.
- Presented key findings through Power BI dashboards and visual reports covering patient service trends, departmental performance, operational workloads, and management KPIs, making complex datasets easier for non-technical stakeholders to interpret.
- Reconciled figures across source files and reporting outputs using **Excel**, **PivotTables**, lookup functions, and conditional formatting to trace reporting variances and maintain consistency in recurring business reviews.
- Brought together information from **SQL Server, Azure SQL Database, Salesforce, SharePoint, and flat files**, creating more consistent datasets for cross-functional reporting and healthcare performance analysis.
- Prepared source data for downstream analysis through **Azure Data Factory (ADF)** and **Power Query**, supporting extraction, transformation, and integration processes across multiple operational systems.
- Replaced repetitive manual preparation steps with **Python** scripts for data standardization, recurring calculations, and trend comparisons, making routine analytical tasks more consistent and easier to reproduce.
- Worked with healthcare operations and finance stakeholders to clarify reporting needs, establish consistent **KPI definitions**, and turn broad business questions into structured analytical requirements and actionable findings.

PayPal **Chennai, India**
Tableau Developer / Analyst **Oct 2022 – Jan 2024**

- Contributed to business reporting initiatives by designing interactive dashboards and analytical reports using **Tableau Desktop** and **Tableau Server**, enabling stakeholders to monitor operational performance and business trends.

- Extracted, transformed, and analyzed enterprise datasets using **SQL, T-SQL, Azure SQL Database, and Excel**, ensuring data accuracy, consistency, and completeness for reporting purposes.
- Developed dynamic Tableau dashboards utilizing **calculated fields, parameters, filters, sets, Level of Detail (LOD) expressions, drill-downs, and dashboard actions**, improving report usability and user engagement.
- Wrote optimized **SQL** queries involving joins, subqueries, CTEs, window functions, aggregations, and data validation techniques to support analytical reporting and business intelligence initiatives.
- Performed data cleansing, transformation, and preparation using **Tableau Prep, SQL, and Excel**, ensuring high-quality datasets for visualization and downstream reporting.
- Supported cloud-based reporting environments by working with **Azure Synapse Analytics** and **Azure Data Factory (ADF)** to understand enterprise data integration and reporting workflows.
- Automated recurring reporting activities and approval workflows using **Power Automate**, minimizing manual intervention and improving reporting efficiency.
- Enhanced Tableau dashboard performance through worksheet optimization, efficient calculations, context filters, and data source optimization, resulting in faster dashboard response times.
- Participated in Agile delivery by contributing to sprint planning, backlog refinement, defect tracking, and project documentation using **JIRA, Confluence, and Azure DevOps**.
- Assisted in deployment activities through **Azure DevOps CI/CD pipelines**, Git version control, and release validation to ensure smooth migration of reporting solutions across environments.
- Worked closely with business users and technical teams to troubleshoot reporting issues, resolve data discrepancies, and continuously enhance Tableau dashboards based on stakeholder feedback.

Swiggy India **Chennai, India**

Data / Business Analyst **Jun 2021 – Sep 2022**

- Collaborated with business stakeholders to understand operational challenges, document business requirements, and translate functional needs into data-driven reporting solutions.
- Assisted in developing interactive business dashboards using **Power BI Desktop** and **Power BI Service**, providing stakeholders with meaningful insights into operational performance and business KPIs.
- Gathered, cleaned, validated, and transformed business data using **SQL, T-SQL, Excel, Power Query, and M Query**, ensuring high-quality datasets for reporting and analysis.
- Designed business reports using **DAX measures, calculated columns, KPIs, time intelligence functions, and conditional logic**, enabling users to monitor trends and key business metrics.
- Supported data modeling activities by implementing **Star Schema**, establishing relationships between fact and dimension tables, and improving report performance and scalability.
- Conducted business data validation using **SQL queries, Excel PivotTables, VLOOKUP, XLOOKUP, and reconciliation techniques**, ensuring consistency between transactional systems and reporting outputs.
- Participated in requirement elicitation workshops, stakeholder meetings, and user acceptance testing (UAT), ensuring business expectations were accurately reflected in reporting deliverables.
- Published and maintained reports within **Power BI Service**, managing workspaces, scheduled refreshes, gateway configurations, and report distribution under senior guidance.
- Assisted in implementing **Row-Level Security (RLS)**, workspace permissions, and access governance to ensure secure and role-based visibility of business reports.
- Supported **SSIS**-based ETL workflows and monitored scheduled data integration processes to ensure timely availability of business reporting data.
- Participated in Agile ceremonies, sprint planning, backlog grooming, and project documentation using **JIRA, Confluence, and Azure DevOps**, ensuring effective collaboration across project teams.
- Applied report optimization techniques including **Query Folding, efficient data modeling, lightweight visualizations, and optimized DAX calculations** to improve dashboard performance.
